

SEVEN DOWNTOWN DETROIT COMPANIES WORKING TOGETHER

ExperienceIT is a non-profit collaboration between leading information technology organizations and workforce agencies in Detroit committed to facilitating the growth and resilience of the IT workforce in the region.

Our vision is to focus alignment between business, educational institutions and students; establishing Southeast Michigan as an internationally recognized and respected technology hub.

2014 EXPERIENCEIT PROGRAM OVERVIEW

MISSION

Develop and execute continued educational training and practical experience for aspiring IT professionals; delivering alignment between the region's information technology employers and curricula taught by participating academic institutions.

WHAT IS EXPERIENCEIT?

IT IN THE D NOW EXPERIENCEIT

We've restructured and rebranded! As of spring 2014, IT in the D will now be operating as ExperienceIT. We're excited to show you what's changed!

WHAT YOU WILL LEARN

A competency analysis examination will determine exactly what training you will need to be eligible for full-time employment at one of the ExperienceIT companies. From there, you will be provided with individualized training, from our training partners, in the following two categories:

TECHNICAL TRAINING: .NET and related technologies, in the following roles: Software Developer, Project Manager, Business Analyst. The class is so intensive, you will be earning certification in Microsoft technologies.

SOFT SKILLS TRAINING: Working in the classroom is much different than working in a company setting. We will provide you with the experience and tools needed to be successful and valuable in the workplace.

TRAINING PARTNERS: All technical training will be provided by Google-backed start-up Grand

Circus. Soft skills training will be provided by the Workforce Intelligence Network and Detroit Employment Solutions. All of this is possible with funding from Automation Alley.

WHY WE'RE DIFFERENT

PRACTICAL EXPERIENCE: With ExperienceIT you won't be making copies or coffee runs. You will experience extensive IT and/or social skills training that prepares you for the workplace and puts you on par with experienced professionals. Not only will you leave with experience (and a job), at the end of the program, you will given the opportunity to earn your MCSD .NET Certification.

NETWORKING: In addition to training, students will have the ability to network with C-level executives, as well as other top professionals in the industry. Once you are an ExperienceIT alum, you will belong to a tight network of amazing technologists, for a lifetime.

GUARANTEED EMPLOYMENT: The ExperienceIT partners guarantee full-time, paid opportunities to all students who complete the program. No other program offers this unique opportunity

WHO YOU ARE

We are looking for students who:

- Want to work in tech as a career.
- Want a full-time opportunity (internship or full-time employment).
- Have the right aptitude and attitude.
- Work well with others. The ability to collaborate on teams is essential.
- Possess leadership abilities. We are looking for the next leaders of our organizations. Are you up to the challenge?

WE WANT YOU!

Does this sound like a program you would be interested in? If yes, we want you to apply! Find details on how, below.
